**UNIQUE • INNOVATIVE • PRACTICAL**

Products for the installation, maintenance and operation of fire hydrants

## HYDRA-KLEEN

*Fire Hydrant Degreaser • Eco-friendly • NSF A1 Registered*

NSF  
Registered Compound  
Program Listed A1  
Registration #121212

Specifically formulated for use on fire hydrants, this new NSF-registered degreaser effectively cleans nozzle and cap threads during fire hydrant maintenance. This product works hand in hand with Hydra-Eze™ Anti-Seize lubricant, which can be applied after using Hydra-Kleen to thoroughly degrease and clean the nozzle and cap threads.

Hydra-Kleen is a uniquely formulated, NSF A1 registered aerosol spray. The degreaser's powerful foaming action dissolves and breaks down weathered/contaminated compounds previously applied to nozzle and cap threads, simplifying the maintenance process. More importantly, Hydra-Kleen will make a hydrant even more reliable during emergency situations.

While this product was designed specifically for use on fire hydrants, it can be used anywhere a degreaser is needed.

### BENEFITS

Foaming action breaks apart weathered/contaminated material

Easier removal of old thread compound

“Like new” threads for new Anti-Seize application

Cleaner, more effective Anti-Seize application

*Hydra-Kleen is designed to work with Hydra-Eze*

## HYDRA-EZE™

*A Food Grade Anti-Seize developed specifically for fire hydrants • NSF H1 Registered*

Hydra-Eze™ is a premium, non-drying lubricant and anti-seize designed specifically for maintaining fire hydrant caps and nozzles. Hydra-Eze™ is NSF-approved as a food-grade product. Assured Flow Sales Inc. has engineered Hydra-Eze™ to provide superior lubrication and anti-seize capabilities, allowing easy cap removal without thread damage.

While Hydra-Eze™ is formulated for fire hydrants, the product is also excellent for water plant maintenance, meter connections and other threaded connections where a food-grade solution is required.

Products for the installation, maintenance and operation of fire hydrants

**BEFORE & AFTER**

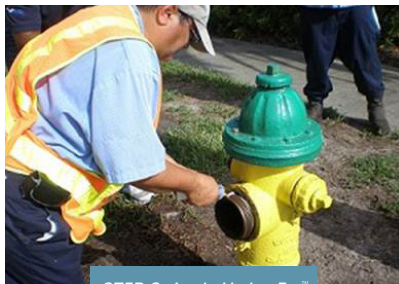

## HYDRA-KLEEN

### APPLICATION INSTRUCTIONS:

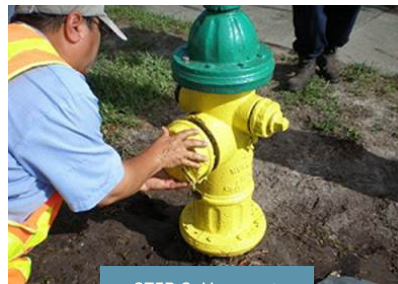

- Liberally spray nozzle and cap threads, then allow the product to dissolve into old thread compound.
- After a few moments, thoroughly scrub nozzle and cap threads with a wire brush to break up the old material.
- Apply another light mist of the degreaser on the threads, then wipe clean with a terry cloth or rag.
- Open the hydrant and allow the potable water to flush the interior portion of the nozzles. Also, fill a bucket with the potable water and use it to rinse the nozzle and cap threads. Wipe clean and dry the cap and nozzle threads with a soft cloth.
- Now that the threads have been thoroughly cleaned, apply Hydra-Eze™ Food Grade Anti-Seize for a brand new anti-seize application.

*STEP 1: Apply Hydra-Kleen, then clean threads.*

*STEP 2: Apply Hydra-Eze™ onto threads.*

*STEP 3: Use cap to distribute Hydra-Eze™.*

*FINISHED! Hydrant threads are fully cleaned and lubricated.*
